

S.H.I.F.T APPROACH

EZRINA FEWINGS FHEA

This contemporary framework enables educators to challenge and shift their learning and teaching perspectives through a five-step process, and prepare for the 'augmented era'.

ONLINE SEMINAR

WEDNESDAY, 30 OCTOBER 2019
11:45AM - 12:45PM

Transformative teaching is designed to engage, challenge and transform learner experiences, with the goal of inspiring learners to seek wisdom throughout their lives.

The five steps outlined below will encourage educators to see themselves as life-long learners too by embracing an agile constructivist approach that inspires leadership, responsiveness and transformation in learning and teaching.

The S.H.I.F.T Approach

- **S**caffold best practices in learning
- **H**igher-order thinking skills
- **I**ntegrate evidence-based teaching
- **F**acilitate metacognitive strategies
- **T**echnologies option

With this in mind, the S.H.I.F.T Approach is an effective academic professional development method as it challenges educators to self-reflectively consider their pedagogical practice. This iterative process also provides educators the opportunity to develop their own pathway to professional agency with a commitment to teaching excellence.
